

# TOP YIELDING AGI SOYBEAN VARIETIES

## AGI 26R03

Our best selling Variety in 2008. Our top yielding variety in 2006 and 2007. You absolutely will not be disappointed with this bean. This is the "Dream Bean" you've been waiting for. It's early and it yields!

### Stats:

Maturity: 2.6  
Plant Height: Tall  
Plant Type: Medium  
Emergence: 1.5  
Gene: Rps 1c  
Tolerance: 1.5

## AGI 27R04

Brand spanking new for 2009. Handled the wet spring of 2008 with excellence. Two year PSL Data puts this bean at the top of the late group II's. I grew this one in my back yard and loved the way it looked!

### Stats:

Maturity: 2.7  
Plant Height: Med-Tall  
Plant Type: Medium  
Emergence: 1.6  
Gene: Rps 1k  
Tolerance: 1.9

## AGI 28RN08

I picked this variety because of its strong performance in Indiana and Ohio. It did great in my plot last year and we decided to increase production for 2009. Excellent choice for 15" rows or even wider. Hard to beat the 1K gene for PRR in our soils. Harvests great!

### Stats:

Maturity: 2.8  
Plant Height: Medium  
Plant Type: Semi-Bush  
Emergence: 1.5  
Gene: Rps 1k  
Tolerance: 1.8

## AGI 29RN06

This bean yielded first in 60 Elite tests in 2005-2006 for maturity range. I like everything about this bean except, it takes it's time getting out of the ground. Plant it later and you will be happy with the yield. Averages 1.5 bu/acre over Pioneer 92M91 and 2.0 bu/acre over 93M11.

### Stats:

Maturity: 2.9  
Plant Height: Tall  
Plant Type: Medium  
Emergence: 1.8  
Gene: Rps 1c  
Tolerance: 1.0

# TOP YIELDING AGI SOYBEAN VARIETIES

## AGI 30RN05

Our “mean bean” for the soils you just can’t tame. The best Root Rot bean in the line up with Rps 1 K- BSR and SCN. A must for farms with marginal drainage. We are the only company that picks varieties that will grow in concrete, since we farm also!

### Stats:

Maturity: 2.9  
Plant Height: Med-Tall  
Plant Type: Medium  
Emergence :1.7  
Gene: Rps 1k  
Tolerance: 1.0

## AGI 31R04

This variety has been the number one selling bean in Ohio the last several years. It just doesn’t fail and its height and seed size puts bushels in the bin. This is the tallest variety in our line up, yet combines nice.

### Stats:

Maturity: 2.9  
Plant Height: Tall  
Plant Type: Medium  
Emergence: 1.5  
Gene: Rps 1c  
Tolerance: 2.0

## AGI 31RN05

Brand spanking new for 2009! Striking gray/tan appearance at harvest. In 2006 & 2007, it was the #1 bean in 50 Elite trials, ALL LOCATIONS!! Beats up Pioneer 93M11 and Asgrow 3203 by 3 bushels per acre. Oh Yea, I want this one!

### Stats:

Maturity: 3.1  
Plant Height: Med-Tall  
Plant Type: Medium  
Emergence: 1.5  
Gene: Rps 1c  
Tolerance: 1.5

## AGI 34RN03

The competitors call this the “sexiest” bean on the market. I’m not sure I know what that means, but it sure is pretty to look at. We will just call it “eye candy”. Similar disease package to AGI 31R04 with excellent yields. Combines nice!

### Stats:

Maturity: 3.4  
Plant Height: Med-Tall  
Plant Type: Medium  
Emergence: 1.5  
Gene: Rps 1c  
Tolerance: 1.5

# TOP YIELDING AGI SOYBEAN VARIETIES

## AGI 34RN06

Great new variety in the mid group III range with killer yields. Averaged 4.1 bu/acre over DK31-51 and 3.9 bu/acre over Pioneer 93M51. Superior disease package and our bushiest bean in the line up.

### Stats:

Maturity: 3.4  
 Plant Height: Med-Tall  
 Plant Type: Bush  
 Emergence: 1.1  
 Gene: Rps 1c  
 Tolerance: 1.5

Limited supply for 2009

## The Pond Seed Company Serving Agriculture since 1927

Being a small family owned business is our biggest advantage. We have the ability to get the newest and best varieties to you several years quicker than the mega-companies. Our varieties are hand picked for our soils, grown by our local farmers, and processed in our facility. Quality control doesn't get any better than this folks. Each one of our varieties has been awarded the NO-TILL TOUGH and RESIDUE READY status. These are indeed the best you can buy.
